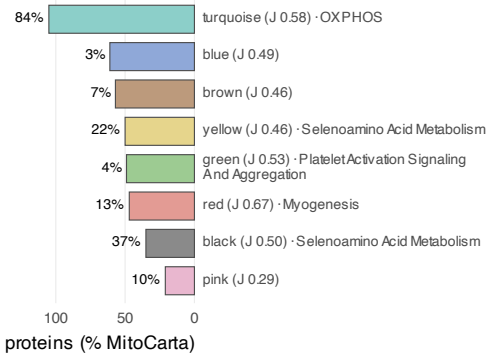
**Modules against contrasts and phenotypes**

r-equivalent of each t, bold if absolute r ≥ 0.4; AUC cells show the AUC, filled by 2·AUC − 1; J: subsample stability



| Module | Contrast: Female | Contrast: Male | Contrast: Treatment × sex | Female traits: CSA | Female traits: Capillaries | Female traits: Sat. cells | Female traits: Sol. pyr | Female traits: Pla. pyr | Female traits: Sol. oct | Male traits: CSA | Male traits: Capillaries | Male traits: Sat. cells | Male traits: Sol. pyr | Male traits: Pla. pyr | Male traits: Sol. oct | AUC (PAS vs vehicle): Female | AUC (PAS vs vehicle): Male |
