Signal by GO Slim family
fgsea; a term counts in every family it belongs to; 20 families with most terms
Anatomical structure development
Signaling
Muscle system process
Cytoskeleton organization
Nucleobase-containing small molecule metabolic process
Cell differentiation
Carbohydrate metabolic process
Programmed cell death
Nervous system process
Mitotic cell cycle
Telomere organization
Protein-containing complex assembly
Detoxification
Cell adhesion
Carbohydrate derivative metabolic process
Protein catabolic process
Mitochondrion organization
Generation of precursor metabolites and energy
Chromosome segregation
Sulfur compound metabolic process
